RAPIDSTOP® TOURNIQUET

RAPIDSTOP® TOURNIQUET

INTUITIVE. STRONG. LIFESAVING.

DESIGNED TO WORK, FAST.

The RapidStop® Tourniquet is an award-winning, rapid application tourniquet that maximises the chances of survival. RapidStop® was inspired by a need identified by first responders at the Boston Marathon Bombings.

Using the extensive experience gained from working with the Metropolitan Police, Aero Healthcare developed the RapidStop® Tourniquet alongside MIT engineers. And, perfected through real-world Emergency Medical Services (EMS) and Military testing, the fastest tourniquet ever created is designed to work in the toughest of conditions. RapidStop® represents a haemostatic solution with military-grade ruggedness, all age suitability, superior single-handed application and the fastest average occlusion time.

RAPIDSTOP® TOURNIQUET

RAPIDSTOP® TOURNIQUET

MILITARY / TACTICAL

Rugged, reliable and quick features make the RapidStop® ideal for military use in high-stress trauma situations where application time is critical. Single-hand self-application ensures fast application and a proprietary clasp mechanism prevents premature release. The lightweight tourniquet also packs flat for easy personal carry.

FIRST-RESPONDERS

RapidStop® is the one-size-fits-all tourniquet for Police, Fire and Paramedics. Our proprietary technology ensures fast, easy application in emergencies, with the one device providing rapid occlusion for both adults and children eliminating the need for multiple devices or extra training.

HIGH-RISK INDUSTRIES

Regardless of the industry, RapidStop® is an essential life-saving device that offers maximum efficacy when it's needed the most, and with minimal training required. Every high-risk activity from farming to manufacturing has a threat of severe injury. RapidStop® prepares the workforce for when the worst eventuality happens.

EXTREME SPORTS

The risks of acute trauma due to accidents are real, making the RapidStop® Tourniquet an essential piece of equipment for the outdoor adventurer. The slim, lightweight design makes a small addition to a kit, but with significant effects in an emergency situation.

INTUITIVE.

Fast and easy single-handed self- application are paramount to a tourniquet's effectiveness in any environment. RapidStop® stands out from the competition as one of the few tourniquets that exceed these life-saving requirements utilising key patented and proprietary technologies.

STRONG.

Made in America and built tough to military standards. The patented ratchet lever technology is made from the same polycarbonate used in the F-22 jet fighter canopy. The tourniquet's band is made from high-strength nylon webbing rated to a two-ton breaking point. RapidStop® has constructed the tourniquet to endure extreme temperatures and resist any corrosion, ensuring it stands true in the toughest of conditions.

LIFESAVING.

Easy as 1-2-3. Three quick and simple steps set RapidStop® Tourniquet apart from the competition. Clear instructions enable an untrained user to apply the tourniquet with speed and reliability. Integrated instructions on the RapidStop® Tourniquet are stitched on as weather-resistant waterproof vinyl tags. Pocket-sized instruction cards make learning and becoming familiar with the RapidStop® easy.

RAPIDSTOP® TRAUMA SOLUTIONS

A trauma solution isn't supplementary to first aid, it's essential.

RAPIDSTOP® BLEED CONTROL KITS

The RapidStop® Bleed Control Kit has everything you need to save lives, FAST.

The RapidStop® Bleed Control Kits are designed for quick and effective control of mass haemorrhaging. These compact kits are designed to provide treatment options with efficiency and effectiveness in mind, whether used in Military, First Response or Civilian environments.

KIT CONTENTS

RSK500 Standard
